MERIEM AFAF HADDOU

Junior Computer Science Engineer

Algeria • +213777796960 • afafmeriem.haddou@gmail.com • Website • LinkedIn • GitHub

SUMMARY

I'm a computer science engineer who likes to understand why things work the way they do, not just whether they work. I'm curious about problems that don't have obvious answers, and I tend to dig deeper when results don't match my expectations. I'm currently exploring machine learning research, particularly explainable and reliable AI, while keeping an open mind about where my interests may lead.

EXPERIENCE

Fullstack Developer, Innovia *Sep 2025 – Present*
Algiers, Algeria – Remote

- Worked on a multi-tenant Django platform with 12 modules and 200+ REST APIs.
- Developed backend models and APIs, including tenant isolation and role-based access control.
- Built Vue.js components with Pinia, pagination, and lazy loading.

Python Developer, Intersec Group *Sep 2024 – Sep 2025*
Paris, France – Remote

- Developed Python services and data pipelines for telecom and geospatial data, working with millions of events, SQL, asynchronous programming, and AWS S3.
- Improved a SQLite pipeline processing 30M rows, reducing its runtime by 40%.
- Worked on an event-driven IVR system using Telnyx webhooks, caller lookup, and caching for real-time call handling.

Machine Learning Research Intern, LMCS / LCSI *Sep 2023 – Jun 2024*
Algiers, Algeria – Hybrid

- Studied concept drift and how changes in data distributions can affect machine learning models.
- Worked on RELIO, a concept drift detection approach based on Optimal Transport and joint multivariate distributions.
- Tested the approach on 8 datasets, with experiments recovering up to 67% of predictive performance lost under drift.

PROJECTS

Dentix – Dental Clinic Management System *May 2026 – Jun 2026*
Freelance Project

- Built a desktop application for a dental clinic using Electron, Python, Vue.js, and SQLite.
- Worked directly with a dentist to understand the clinic's needs and turn them into application features.

TECHNICAL SKILLS

Backend: Django, FastAPI, Tornado, REST APIs, Asynchronous Programming
Databases & Tools: PostgreSQL, SQLite, Docker, Git, AWS S3 (boto3), Grafana, Postman
Programming Languages: Python, SQL, JavaScript
Machine Learning: Scikit-learn, TensorFlow, Keras, Optimal Transport

EDUCATION

Higher National School of Computer Science (ESI), Algiers *Sep 2019 – Jun 2024*
State Engineering Degree & Master's Desgree in Computer Science
