

MERIEH AFAD HADDOU

Software Engineer

Algeria • +213777796960 • afafmeriem.haddou@gmail.com • Website • LinkedIn • GitHub

SUMMARY

Software engineer focused on systems that hold up under real load and real edge cases, not just clean demos. Comfortable moving across languages and stacks when the problem calls for it, drawing on production engineering discipline and research training to move carefully from problem to solution.

EXPERIENCE

Fullstack Developer, Innovia

Sep 2025 – Jun 2026

Algiers, Algeria – Remote

- Architected a scalable multi-tenant Django SaaS with 12 modules and 200+ REST APIs.
- Designed backend data models, tenant isolation, RBAC, and reusable search modules.
- Built reusable Vue.js components with Pinia, pagination, and lazy loading.

Python Developer, Intersec Group

Sep 2024 – Sep 2025

Paris, France – Remote

- Built production data pipelines across multiple telecom and geospatial sources, processing millions of events with Python, asyncio, SQL, and AWS S3.
- Optimized a 30M-row SQL pipeline with SQLite, reducing runtime by 40%.
- Architected an event-driven IVR system, handling real-time call flows via Telnyx webhooks with CLI-based caller lookup and a caching layer to cut alert latency.

Research Intern, LMCS / LCS

Sep 2023 – Jun 2024

Algiers, Algeria – Hybrid

- Reviewed the state of the art in concept drift detection studying why models trained under one data distribution degrade once deployed under a shifted one.
- Proposed an improved early-detection method for this distribution shift using Optimal Transport.
- Achieved up to 45% better predictive performance through early drift detection and model monitoring.

PROJECTS

Dentix – Dental Clinic Management System

May 2026 – Jun 2026

Freelance Project

- Built a modular desktop application using Electron, Python, Vue.js, and SQLite.
- Designed an optimized relational database, improving patient data access by 80%.

TECHNICAL SKILLS

Backend: Django, FastAPI, Tornado, REST APIs, Asynchronous Programming

Databases & Tools: PostgreSQL, SQLite, Docker, Git, AWS S3 (boto3), Grafana, Postman

Programming Languages: Python, SQL, JavaScript

Machine Learning: Scikit-learn, TensorFlow, Keras

EDUCATION

Higher National School of Computer Science ESI Algiers (ex. INI)

Sep 2019 – Jun 2024

State Engineering Degree & Master's in Software Engineering

LANGUAGES

Arabic: Native **French:** Fluent **English:** Fluent
