

MERIEM AFAF HADDOU

Beni Saf, Algeria ♦ +213777796960 ♦ jm.haddou@esi.dz ♦ Portfolio ♦ LinkedIn ♦ GitHub

EDUCATION

Higher National School of Computer Science ESI (ex.INI)

Sep 2019 – Jun 2024

Software Engineer

Relevant Coursework: Software Architecture, Design Patterns, Software Quality, Databases, Web & Mobile Development

EXPERIENCE

Fullstack Developer, Innovia

Sep 2025 – Jun 2026

Algiers, Algeria – Remote

- Improved parcels tracking system reliability by refactoring core backend and frontend modules.
- Optimized delivery workflow APIs, reducing complexity across multiple client environments.
- Delivered production features for a logistics SaaS used in parcel and fleet management.

Python Developer, Intersec Group

Sep 2024 – Sep 2025

Paris, France – Remote

- Architected multi-tenant SaaS with 12 modules and 200+ APIs serving logistics clients.
- Designed 3D data isolation model ensuring zero cross-tenant data leakage across system.
- Delivered RBAC, reusable search module, and Vue.js features with Pinia and i18n.

Research Intern, LMCS / LCSI

Sep 2023 – Jun 2024

Algiers, Algeria – Hybrid

- Built an Optimal Transport-based drift detection system identifying data shifts before model failure across 8 datasets.
- Improved monitored model performance by up to +45pp accuracy over unmonitored baselines.

PROJECTS

Dentix – Dental Clinic Management System

Freelance Project

Electron, Vue, Python & SQLite

- Built dental clinic desktop app, improving data access efficiency by 80%.
- Designed Python and SQLite backend enabling fast, reliable data storage and retrieval operations.
- Developed Electron & Vue.js interface supporting patients, appointments, and treatment workflows.

Flood Warning IVR System (Telnyx)

Intersec Group

Real-time Voice Alerting System

- Built event-driven IVR system delivering real-time flood alerts via 8 Telnyx call flows.
- Reduced average alert access time by 30% using an optimized caching strategy.
- Integrated webhooks and DTMF navigation for reliable real-time call handling under constraints.

SKILLS

Languages: Python, Java, JavaScript, Kotlin, C/C++

Frontend: Vue.js, SPA architecture, Pinia state management, UI development

Backend & Systems: Django, REST APIs, event-driven systems, system design

Mobile & Databases: Android (Kotlin), Flutter, SQLite, PostgreSQL

Tools & Data: Git, Gerrit, Postman, Behave, Telnyx, NumPy, SciPy, Scikit-learn, TensorFlow, POT
